"For all your internet and general computer requirements for the home and small business"

Why buy from SCIS UK Limited?

High Quality & Reliable

Buying a computer is not by any means a cheap exercise. When buying a car, the build and quality of the vehicle is of paramount importance, so why should your computer be any different?

Because we build all of our computers ourselves, we know what parts go into them and can make sure that these parts are of excellent quality.

In the competitive world of computers, retailers often try and undercut each other so much; something has to be sacrificed along the way, usually the quality of parts used.

We will not do this – as things are bound to go wrong at a later date. A computer purchased from ourselves contains only the best of parts from manufacturers like ASUS, Sony, Maxtor, Kingston and AMD – meaning that your computer will be more stable, more reliable and that it will perform when you want it to!

Updated Before Dispatch

When ordering a computer from us, your machine is built up with care before having the operating system and all drivers installed. Once this is done, the machine receives an operating system update via the internet to ensure that it has the latest software release.

After a machine is built and updated, it is tested, given a polish and then has its badges applied, before being boxed up ready for dispatch.

Free Delivery and Setup

We provide free delivery and setup within the Lincoln area on all computers we sell, which includes your internet, printer, scanner etc – some companies charge £50.00+ for this service alone.

Should you have any data on an old machine that you would also like transferring, we are quite happy to do this for you while we are there so that you are up and running before we leave.

The backup afterwards

Should you have any queries after buying a computer from us, you can always feel free to contact us for friendly support and answers to all of your questions, whether it be by phone or e-mail, we will be here to assist you.

Warranty

We don't very often need to say a lot about this, for obvious reasons, but things can and sometimes do go wrong – which is why we offer a 1 year warranty on the whole of your computer system and a 3 year manufacturer warranty on all monitors or TFT screens.

Thank you

Thank you for reading the above information, we hope we can be of service to you.
