

Our hosted PBX is a cost effective, fully integrated cloud based telephony system that provides a feature-rich web portal and Yealink handsets as part of the package.

Simplified Analytics allows you to access enhanced call recording technology, call statistics and wallboard features to monitor and manage day to day call activity within your company.

Features

- Call recording – MiFID II compliant lifetime call recording with full audit trail and search facility
- Multi view wallboard
- Management reports - At-a-glance graphical reports on all call activity and end of day call statistics
- Easy to manage self serve admin portal
- PCI DSS compliant recording
- GEO redundant solution hosted in UK based data centres – ISO27001 accredited
- Screen popping and active directory integration for shared address books

Roadmap Features

- Software integration with MS-Exchange, Skype For Business, click-to-dial and over 300 CRM applications
- Softphone integration
- Auto-provisioning and lifetime device management service
